MAP AND TERRAIN DESCRIPTION

Map by Madis Oras, fieldwork in autumn 2023, scale: depending on the class, contour interval 5 m. Old maps: [Vooremäe](#)

Vooremägi is a 60 m relative height mountain with a dense network of trails and roads. The forest's passability is mostly good and average. The terrain has some small marshes in the flatter southeastern and southern parts. Thinning has been carried out in several places in the last couple of years. There are many small running tracks and mountain bike trails marked on the map with the symbol 507.0 (small bike trail).

STARTS

On the first competition day, there are mass starts. On the second day, individual starts are drawn based on the protocols. The string course and open courses have free starting times.

On April 27, mass starts take place at 10-minute intervals. During the starting interval, the competitor's SI card number is checked, and the map is handed out. The map can be viewed only after the starting signal.

On April 28, the pre-start is 3 minutes. Three minutes before the start, the competitor's SI card number is checked. Two minutes before, additional legends can be confirmed. Additional legends are at the start, and confirmation tools (tape and scissors) are provided at the start. Note: There is no assistant to help with confirming additional legends. One minute before the start, the competitor moves next to their class's map bucket.

FINISH

The finish time is obtained by marking at the finish line. Competitors who marked the edge of the map must show the imprints to the finish officials. On the last competition day, immediately after reading the results from the SI, competitors must return the rented SI card to the organizers. Upon leaving the finish area, each competitor receives a results sheet with their finish and split times.

Those who retire must pass through the finish. If this is not possible, the name of the retiree must be reported to the secretariat/finish. Maps are collected until the end of the starts.
